**CEDEX for Accreditors / Certifiers**

Let CEDex use the small focus lens to follow the moving pieces of continuing education. Not only can we harness all the single credits flying around, the sky's the limit on what you can do with this data once it is organized in a secure central bank.

## CEDex empowers you

- You will be able to access and share data securely with any audience for accredited, and non-accredited CE if you wish.
- There are endless ways to manage accredited and non-accredited CE effectively and efficiently for your purposes.
- Reporting this data to state and national government bodies and associations can reduce budgets and save you money.
- Managing this data and packaging it for audiences that need it to make decisions earns you revenue and addresses funding challenges.
- You can shape policy by presenting the information to decision makers and leverage it to lobby for your industry needs.

## This has bigger implications

- With a central data repository, CEDex provides clear trackable indicators (think Google analytics).
- You are able to react to and adapt to changes in demand for CE in your industry and CE that learners want and need.
